orders.py - Order Facts Only

What this file does (big picture)

orders.py discovers *what is true* about an order.
responses.py decides *how to say it* to the customer.

Business jobs:

1) Find an order by number
2) Read status
3) Read tracking only when shipped/delivered
4) Package those facts as OrderHelpFacts for responses.py

Today data comes from data/orders.json (sample stand-in).

New words you will see in this file

JSON	Structured text data. Sample orders live in orders.json.
dataclass	Typed container for Order and OrderHelpFacts.
facts packet	OrderHelpFacts is the truth object responses.py receives.
Optional	A value may be missing (None), e.g. no order id yet.
regex (re)	Pull ORD-1001 out of free-form sentences.

Flow while the program runs

extract_order_id -> lookup_order -> get_tracking_number (if shipped) ->
get_order_help_facts returns OrderHelpFacts -> responses.render_order_help.

orders.py - Order Facts Only

1-14

```
"""Order tools... facts; wording in responses.py..."""
```

Plain English:
Docstring redraws the boundary: this file is truth, not tone.

16-22

```
imports
```

Plain English:
JSON, regex, dataclass, Path, Optional.

24-32

```
STATUS_* and ORDERS_PATH
```

Plain English:
Allowed statuses and the path to sample order data.

35-61

```
@dataclass class Order
```

Plain English:
One order's fields plus has_shipped(). No customer prose methods.

64-76

```
@dataclass class OrderHelpFacts
```

Plain English:
Truth packet: requested id, found Order (or None), tracking if any.

79-99

```
def _load_orders()
```

Plain English:
Read JSON into a dict of Order objects.

102-129

```
def extract_order_id(text)
```

Plain English:
Parse ORD-1001 / #1001 / order 1001 from messy text.

132-143

```
def lookup_order(order_id)
```

Plain English:
Normalize and find the order, or return None.

146-163

```
get_order_status / get_tracking_number
```

Plain English:
Thin fact accessors. Tracking only when has_shipped().

166-178

```
def get_order_help_facts(question)
```

Plain English:
Build the OrderHelpFacts packet for responses.py. No customer sentences here.
